

Storyboard for Instruction Video - SAMPLE

Goal of Video Instruction	List the Major Components in a Third Rail TPSS
Audience	New Hires
Location	XYZ Yard
Presenter(s) in video	Patty Jo Watson, Line Maintainer
Helper(s) off screen	Joe Smith
Equipment needed	Camera, boom, lighting, pointer, PPE
First Walkthrough	January 5th
Official Taping	January 20th

	Content/Script	Action	Description of Visual
1.	Hello, my name is [Name] and I am a [Job Title] with the [AGENCY] in [City/Region, State].	Technician wears all required PPE and looks into camera during introduction.	
2.	In this video, I will introduce the major components and equipment of a traction power substation on our property. I will start with the area where the electric utility feeds into the substation and then out to distribution. Along the way I will point out the equipment and give a brief description of each component's functions.	Technician points to visual of layout of typical TPSS at their agency. Use boom or hand to indicate where utility enters the TPSS then where it is distributed for use by rail vehicle.	Use an illustration of the layout or overhead plan of the substation as a visual. Example, 
3.	Here is the utility metering section. At our agency our role is to monitor the meter. If we notice inconsistencies or non-functioning, we call the utility company for them to resolve the issue.	Technician points to metering section.	Camera zooms to meter. This can be done as a separate video to be spliced into the overall instruction video.
